

# Warehouse marking

- **Speed up the process of locating goods**
- **Save time**
- **Reduce the risk of mistakes**

A transparent and logical system for marking warehouse locations is crucial for efficient and effective warehouse management. It is not difficult to imagine how much valuable time it takes to locate the right product if there are no legible and clear markings in the warehouse, and how risk of mistakes rises in such case.

We implement projects both in newly constructed facilities and in existing warehouses. Extensive experience, a lot of successful projects and a wide range of available materials allow us to propose a unique and durable solution for most warehouses. Starting from floor marking, through shelves, up to markings at a height of up to 12m, both in standard warehouses, deep freezing areas and even in outdoor squares.

When proposing our concept of marking to the customer, we take into account:

- the specifics of warehouse operations
- current IT system
- ergonomics and durability of the marking
- reduction or elimination of mistakes

We provide both marking materials and a comprehensive service: concept development, material design and assembly. The team of IBCS Poland specialists has the appropriate qualifications to operate forklifts or work at heights.

Our customers include:

**Alima Gerber, Aste, Akzo Nobel, Alpla, Barlinek, Binder International, Cargill, Cersanit, Dekorglass, Ekoplon, Euromark, DHL, Esselte, Hanex, Kludi, Orifame, Procter and Gamble, Royal Canin, Universal Express, Velkom, Zelmer, Żabka.**

“For marking shelves in high storage warehouses, specialists from IBCS Poland recommended high quality colored laminated labels, with printed bar code. Colorful visualization for every shelf level is not only aesthetic, but also significantly improves daily warehouse work and also reduces the risk of mistakes to a minimum. Despite complicated projects, IBCS Poland has fulfilled its task, strictly following our guidelines and comments. “

**Dariusz Makarowski**  
Central warehouse manager Oriflame Poland

“The implementation of warehouse marking our company had to take place in a very short time. An additional obstacle was the fact that about 80% of the work had to be carried out at heights, and the warehouse was operating at all times. IBCS Poland has accomplished this perfectly. Using appropriately selected and provided materials, they marked all locations without disturbing the current one warehouse work and keeping the set deadline.”

**Jaroslaw Mich**  
Warehouse manager Dekorglass Działdowo S.A.
